DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-5, 8-19, 37-44 and 46-63, Group IA, drawn to method of processing a substrate, classified in class 134, subclass 1⁺.
 - II. Claims 29-32, Group IB, drawn to a method for removing contaminant particles, classified in class 134, subclass 1⁺.
 - III. Claims 65-71, Group IC, drawn to method of removing contaminant particles, classified in class 134, subclass 1⁺.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group IA and IB are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the multiple processing chamber do not require the utility of a cleaning chamber utilizing light. The subcombination has separate utility such as cleaning wafers for a semiconductor fabrication which is utilizing multitude of single chambers process.
3. Inventions Group IA and IC are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

Art Unit: 2814

case, the combination as claimed does not require the particulars of the subcombination as claimed because the multiple processing chamber do not require the utility of a cleaning chamber utilizing light in the present of a sacrificial layer. The subcombination has separate utility such as cleaning wafers for a semiconductor fabrication which is utilizing multitude of single chambers process.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
